Gas Stats

Monthly Gas Utility Statistical Report

JUNE 1992

Residential, industrial and electric generation sales increased in June 1992 compared with last year. For the same period, sales of gas to commercial users declined 0.6 percent. Total utility sales increased from 431.3 trillion Btu in June 1991 to 447.1 trillion Btu in June 1992. June transportation volumes to end users increased 14.6 percent compared with last year.

GAS UTILITY VOLUMES TO ULTIMATE CONSUMERS (Trillions of Btu)

	June			Year to Date		January 1 to December 31		
	1992	1991	%Change[1]	1992	(% Change) Last Period	1992 Forecast[2]	1991	%Change
Residential	152.5	142.7	+ 6.9	2,835.7	+ 2.6	4,604.0	4,577.4	+ 0.6
Commercial	85.2	85.7	- 0.6	1,283.9	- 1.2	2,193.8	2,215.3	- 1.0
Industrial*	108.7	106.2	+ 2.4	876.9	- 3.9	1,801.3	1,836.5	- 1.9

[1]Gas volumes are based on, and the percent change is a function of, the 69 sample companies whose sales constitute about 60% of total gas utility sales to ultimate consumers. The peak year in total sales for the gas utility industry occurred in 1972.

[2]1992 forecasts for the residential and commercial sectors are based on available 1992 monthly data with the remaining months derived by using a four year average. The industrial sector forecast (industrial only, electric generation, and transportation) is also based on available 1992 monthly data with the remaining months of 1992 heavily weighted by last year's volumes with no adjustment made for degree days.

[3]Carriage volumes determined by using a simple straight expansion of sample data to represent the total gas utility industry. Carriage volumes for ultimate consumers are volumes owned by the ultimate consumer but delivered to another transporter, not the ultimate consumer, and are therefore broken out to eliminate double counting of volumes delivered to ultimate consumers.
